LAST DAY OF SCHOOL!

A [lunar eclipse](#) occurs when the Sun, Earth, and Moon align so that the Moon passes into Earth's shadow. In a total lunar eclipse, the entire Moon falls within the darkest part of Earth's shadow, called the umbra. When the Moon is within the umbra, it will turn a reddish hue. Lunar eclipses are sometimes called "Blood Moons" because of this phenomenon.

Just in time for TECH DAY!

Tuesday, May 10th is National CLEAN YOU ROOM DAY!
